## A N ote from the D ean on the Class of 2003

Amherst has for over fifty years reported to the secondary school community. I am thrilled to have recently joined the staff here, to have become a participant in this fine tradition, and to pen this, our fifty-third Annual Report to Secondary Schools.

The statistics exhibited are impressive enough, certainly- the second largest applicant pool in the C ollege's history, as diverse a class as you are likely to see at a small liberal arts college, extraordinary standardized test scores (particularly when viewed within the context of national norms), and an increasingly national student profile.

W hat lies behind or perhaps accounts for such statistics is, at least to my way of thinking, more important. W hat has struck me thus far in my brief tenure are the habits of mind of Amherst students; they are curious, comfortable and even joyous in the world of ideas, and deeply committed to the values of a diverse community. Fascinating to me also is the degree to which they are deeply interested in the admission process itself, an interest that I suspect grows out of their knowledge that the content and context of their education in a small community such as ours grows out of the myriad interactions (at all hours, it seems) with their fellow students as much as it does out of formal and informal dialogue with faculty.

N ow, to less inspirational matters. As most of you know, the world of competitive admission is, in polite terms, in a state of flux, or, in less polite terms, a mess. The proliferation of various preferential packaging schemes and the accelerating tendency of even the nation's most competitive institutions to accept a far greater percentage of their class early decision or early action has deeply shaken the small but important world of competitive admission. Although Amherst may one day be forced to join this sad parade, we plan to continue to award financial aid on an equitable
basis and to adhere to the values of need-blind/need-based financial aid. In addition, we plan to accept roughly $30 \%$ of our class early. We are far more concerned with the actual students who show up in our classrooms and dormitories than we are with jiggling our statistics in such a way that we appear statistically more competitive to the general public. Although it would be easy enough for Amherst to accept fewer than $15 \%$ of its applicants, the desire to do so represents a species of lunacy, it seems to me.

These observations may seem overly strong or even cynical to many of you, so I look forward to hearing your own observations of the state of our profession at N ACAC, the College Board, your offices or cafeterias, or wherever else I may bump into you. And so does the rest of the Amherst staff, a thoughtful and equally opinionated lot, I assure you. So let me introduce (or reintroduce) them to you. There are our grizzled veterans: Director of Admission/Senior Associate D ean Katie Fretwell, Senior Associate D irector/Associate D ean Kathy M ayberry, Associate D ean M ichael H awkins; our somewhat grizzled assistant deans, Stan C alhoun, Rob Killion, and C ate Zolkos; our not-at-all grizzled Senior Admission Fellow, Emma C hanlett-Avery, Admission Fellows Brian Simoneau and Guy Johnson, and Admission C ounselor Nancy Ratner.

Finally, I'd like to reciprocate your many kindnesses to us during past years and the upcoming one. Should you be in our area this year, please do not hesitate to give us a call; we would very much enjoy chatting and
